

## 10.18.2013 New Age Christian Church/Carol Pate Psychic Center Meeting

*This is your friendly reminder that damnations are **real**, they are **powerful**, and they can be **harmful**. Removing the word "damn" from your vocabulary (particularly when using God's name) is wise.*

Please click [here](#) if you have questions about Spirit Guides, Guardian Angels, or any other members of God's Spirit Community. Members of God's Spirit Community are never bound to us; they're simply doing their job.

If you have a friend or a loved one who has not gone into the Light, you can pray them into the Light using this formula. Remember though, if they're not a relative then you need a close relative's permission! This can be obtained simply by asking, "can I pray for *(the person who passed)?*"

### Ghosts

- Get rid of the word "ghost"
- They're the souls of people who have passed but didn't go into the Light, and it's our responsibility to help them into the Light using the daily lifting
- The Bible refers to them as unclean spirits.

### Patterns

- It's essential to recognize the patterns associated with *everything*... There are patterns to demonic attack, spirit attachment, mental illness, etc.
- Recognizing patterns allows you to recognize the true nature of the situation so that you can respond appropriately to the scenario at hand

### Energy

- Everything is made up of energy, and this has been scientifically proven
- Your aura is the radiation of your energy, of your life force
- Wind, water, our bodies, buildings, trees, and rocks all have electromagnetic energy
- When there are mass shifts, energy can be created that is felt on a global scale
- When there are frequencies and harmonies of energies to come, people can pick up on and recognize these pre-energies
- Every major event has ripples of energy, both before and after the event
- Sun storms can also affect your balance and energy
- Large groups of people can also affect your energy

### Auras

- For more information, please visit our [Aura, Chakra, and Color Information](#) page
- Everything has an aura- even trees
- If you can truly read auras, you'll know the true character of a person. They can't hide what's in their auras
- If you ever are getting on a plane or you're traveling with a group of people and the majority of people don't have auras, you don't get on the plane or in the car!
- No aura means that death is impending

## 10.18.2013 New Age Christian Church/Carol Pate Psychic Center Meeting

- People with black auras are just bad. That indicates a connectedness with evil, darkness, and Satan
- You can see where there are physical problems in the aura- there are dips or holes
- To cleanse the aura (and remove stress from the physical body), you would add  $\frac{1}{3}$  to  $\frac{1}{2}$  cup of iodized table salt to your bathtub (depending on the size of your tub- bigger tubs need more salt) and soak for as long as you feel necessary
  - Ladies, you can use a washcloth to “wipe away” the auric field surrounding your head and hair.

### Chakras

- Your chakras are vortexes in your body; these vortexes create your aura
  - Vortexes open to release energy, and then they close
- You have 21 chakras; 14 minor chakras and 7 major chakras
- Your major chakras are your circuit breakers for your electrical system
  - If you get into kundalini and attempt to open and close your chakras at will, you can blow your chakras out
    - You can shut your entire nervous system down and paralyze yourself
  - You can safely cleanse and open your chakras using smoky quartz
- They can be shut down through traumas, and cause emotional and physical problems corresponding to the affected chakra

### Plastic

- Plastic blocks energy
- With hypersensitive babies, placing a piece of saran wrap on their solar plexus (put a little water on it so that it adheres to their skin, then dress them as your normally would) will stop them from absorbing negative energies

### Magic

- Magic isn't okay because you use spells, bindings, and conjurations to bend the will of other living creatures away from God for your own selfish purposes. You should be working in harmony with these elements.
  - You don't need to bind other souls and creatures to yourself or anyone else.
  - You can ask the essences of plants to do healing while still allowing them to be free
- Both white and black magic involve bending the free will of other beings away from God, and that's not okay
  - White magic is for the healing and benefit of others, but you can heal and benefit others without bending free will
  - Black magic is because it's for selfishness and manipulation. This is way wrong.

### Bubbles and Tactics

- Bubbles are great tools
  - Subdued golden bubbles are useful for protection and “invisibility”
  - Pink bubbles and eggs are useful to calm people down

## 10.18.2013 New Age Christian Church/Carol Pate Psychic Center Meeting

- Time manipulation is a wonderful tool as well. It's great for long trips because you can knock hours off your trips.
  - To slow down time, you hold the first two fingers on your dominant hand up, point them to the sky, and twirl them **counterclockwise** three times
  - To speed time up, you hold the first two fingers of your dominant hand up, point them to the sky, and twirl them **clockwise** three times

### Flower Essences

- St. John's Shield protects you from negative energies
  - You apply the oil directly to your solar plexus.
- Dandelion oil applied directly to the neck and shoulders removes stress

### Spiritual Airports

- Things can appear out of nowhere, or drop from the ceiling
- Things can "poof" into and out of existence
  - If things "poof" out of existence, you can command it back in the name of Jesus
    - I command (*whatever is gone*) back in the name of Jesus Christ.

### Lost & Found

- If you've recently lost/misplaced something, fret not!
- You can ask your Guardian Angel to please help you locate whatever is missing or help you find whatever is missing. You should get results in about 30 minutes. Remember to say thank you when you find it!

### Carol's Favorite Ability

- Carol loves tapping into ancient ruins to learn about previous cultures, civilizations, etc.
- Macchu Picchu was her favorite place until it became a monopolized "tourist trap"
  - What was once affordable is not around \$1500USD a night
